

TRIBUNOL Readymix Premium Protection

Tribunol Readymix Premium Protection is a high performance, ready-to-use coolant mixture with a 6% solution of organic-based corrosion protection inhibitors, which has been specially adapted to our customer requirements.

DESCRIPTION

Free of inorganic compounds such as silicate, phosphate, amine, nitrite and boron compounds, this application-optimised ready-mix offers extremely reliable protection. In contrast to coolant protection agents based on monoethylene glycol, the ingredients are environmentally friendly and can therefore also be used in domestic heating systems. Its highly active ingredient package protects the metals used in the cooling system from corrosion and deposits, while at the same time protecting all common seals, plastics and hose lines.

Because it is produced with standardised demineralised water, Tribunol Readymix Premium Protection is particularly recommended for use in combined heat and power units and gas engines.

Tribunol Readymix Premium Protection is ready for use and can be used directly without dilution to refill the empty cooling system. This product is miscible and compatible with antifreeze agents of equal performance. However, to ensure safe and trouble-free operation, we recommend not to mix the product with other products.

This product has no freeze protection!

BENEFITS

- long and excellent corrosion and cavitation protection
- universally applicable when conventional KFS fail
- Excellent for aluminium engines, cylinder heads and radiators

Recommended and tested in units for which the following specifications and filling instructions are required:

MTU MTL 5049
Cat
MWM

Baureihen 2000 C&I, 4000 C&I, 4000 Genset
TR 0199-99-2091
Diesel- und Gasmotoren Kühlsystem A, B, C

Use in accordance with the engine manufacturer's instructions
All characteristic data are average values and are subject to production-related fluctuations
